Subject: RE: meet to discuss status of 8801?
Date: Friday, September 10, 2021 12:06:00 PM

Hi Rick,

Based on a discussion with Tasya and a look at the 8801 interim action work plans, I'm no longer concerned about the excavations affecting our pilot test or the barrier wall on the Container Properties/ Rhone-Poulenc site. But we are still interested in knowing the timing of the excavations and seeing any related data/deliverables. Could you share with us the general excavation schedule and timeline for deliverables?

Thanks,
Janette

Hi Rick. At our meeting yesterday you mentioned that excavation should begin soon (next month?) at the 8801 site, and that Erin has moved to a new position. I've copied Tasya Gray who is the consultant that represents Container Properties. I know you are busy and short-handed but would you be willing to briefly talk with me and Tasya (and likely others) about the work at the 8801 site? One reason I'm asking is because we are in the middle of a pilot study at the former Rhone-Poulenc facility to assess aquifer and contaminant behavior inside and outside the barrier wall in the absence of pumping. The wall is close to the property line and we need to be thinking about whether the upcoming excavations might impact that study. Another reason I'm asking is that we're trying to piece together the dioxin/furan contamination located in the sediments in the northwest part of the Rhone-Poulenc property. I realize you are without a site manager for 8801 but it sounds like work is proceeding anyway, so any info you can provide will be helpful to us.

Thanks,
Janette
